

# Food-cabulary

A word association game inspired by food and culture from around the world.

## How to play:

- Begin with someone deciding a food category e.g. 'bread'.
- Ask them to choose someone to say a word associated with that food. It could be a type of that food, for example, 'roti', or a word for it in another language, like 'pain' in French.
- Pass it on around the group. When someone can't think of another associated word, then they choose someone to pick another food category.
